

## Environmental Stewardship Program

Atlantica Hotels is committed to involving colleagues, guests and partners in the common goal of preserving and protecting our planet.

Atlantica Hotels Environmental Stewardship Program allows us to meet and exceed guest expectations, while optimizing operational sustainability. It focuses on continuous improvement in waste management, sustainability, community involvement and energy and water conservation at our properties.

Through operational improvements, environmental benefits are realized, often through reduced utilities consumption and best practices. Our sustainability efforts encompass everything from recycling and organic waste diversion in the hotel's kitchens to retrofitting energy-efficient lighting. They also include such activities as redistribution of household goods and food to those in need.

As part of our commitment to choosing sustainable energy options, all meeting & function space and administrative offices at Atlantica Hotel Halifax are bullfrogpowered<sup>®</sup> with 100 per cent green electricity. Bullfrog's 100 per cent green electricity comes exclusively from wind and hydro facilities that have been certified as low impact by Environment Canada under its EcoLogo<sup>M</sup> program instead of from polluting sources like coal, oil, natural gas, and nuclear.
